EDUCATION

Virginia Tech **Blacksburg, Virginia**
B.S in Computer Science *May 2027*

- **Related Coursework:** Problem Solving and Programming, Object-Oriented Programming, Data Structures and Algorithms, Computer Systems, Discrete Structures, Computer Organization 1 & 2, Software Design & Data Structures.

EXPERIENCE

Target **Christiansburg, Virginia**
Guest Advocate *April 2025 - Present*

- Assisted **50+ guests per shift** with purchases, returns, exchanges, and service questions while delivering strong customer service in a fast-paced retail environment.
- Processed guest transactions and supported loyalty program enrollments while helping maintain efficient front-end operations and reduced waiting times during peak hours.
- Prepared and delivered **20+ Drive Up and Order Pick Up orders per shift** with **95%+ order accuracy**, supporting timely fulfillment and a smooth guest experience.

PROJECTS

AI Medical App **Blacksburg, Virginia**
Software Engineering Project Member *Jan 2026 – May 2026*

- Developed an AI-powered pediatric emergency support app with **5 core features** including sepsis detection, **PALS** cardiac arrest guidance, medication dosing, voice prompts, and role-specific dashboards.
- Help design and test protocol workflows using **Phoenix criteria** and pediatric emergency guidelines, contributing to **36+ validation checks** across usability, accuracy, and clinical relevance.
- Collaborated with Egyptian students in an embedded study abroad project to build and refine clinical decision-support features using **React, JavaScript, HTML/CSS, and speech-based tools**.

Wonderful Chess AI
Personal Project

- Developed a web-based chess game using **JavaScript**, **HTML**, and **CSS**, implementing **10+ core systems** including legal move enforcement, promotion logic, captured-piece tracking, move history, responsive UI, and dark mode.
- Integrated **Stockfish** and a custom fallback engine using **Minimax** with **Alpha-Beta Pruning**, supporting **3+ AI difficulty settings** for real-time gameplay decision making.
- Built timing and interface features for competitive play, including chess clocks, increment controls, and cross-platform responsiveness, improving usability across **desktop and mobile devices**.

Portfolio Website
Personal Project

- Designed and developed a professional portfolio website showcasing my skills, projects, and achievements using HTML, CSS, and JavaScript.
- Implemented a responsive design to ensure optimal viewing experience across various devices, enhancing user accessibility.
- Incorporated JavaScript for interactive features, such as dynamic content updates, form validation, and smooth transitions, enhancing overall user engagement.

Product Website
Personal Project

- Designed and developed a visually appealing product showcase website using HTML, CSS, and JavaScript, ensuring a modern and user-friendly interface.

Awards

Virginia Tech **Blacksburg, Virginia**
Dean's List *Fall 2025*

- Awarded for earning a 3.4+ semester GPA while completing at least 12 graded credit hours
- Recognized for strong academic performance and consistent achievement during the semester
- Selected for inclusion on the Dean's List based on semester academic excellence

SKILLS

Programming: Java, Python, JavaScript, HTML/CSS, MATlab, Node.js, React.js, C
Tools: AWS, Visual Studio Code, PyCharm, jGRASP, IntelliJ, BlueJ, Git/Github, Agile, Eclipse
